RONIN EUROPE LIMITED

MANAGEMENT REPORT

The Board of Directors of Ronin Europe Limited (the "Company") presents to the members its Management Report and audited financial statements of the Company for the year ended 31 December 2019.

Incorporation

The Company Ronin Europe Limited was incorporated in Cyprus on 21 August 2006 as a private limited liability company under the provisions of the Cyprus Companies Law, Cap. 113.

Principal activities and nature of operations of the Company

The principal activities of the Company, which are unchanged from last year, are the operation as an investment firm and the provision of investment and related services. On 31 October 2007 the Company received a Financial Services license from the Cyprus Securities and Exchange Commission (CySEC) for the provision of these services. The Company's license was subsequently amended on 7 November 2011, whereby the Company has also been granted a license for trading on own account.

Review of current position, future developments and performance of the Company's business

The Company's development to date, financial results and position as presented in the financial statements are considered satisfactory.

Principal risks and uncertainties

The principal risks and uncertainties faced by the Company are disclosed in notes 6 and 7 of the financial statements.

Existence of branches

The Company does not maintain any branches.

Results

The Company's results for the year are set out on page 6.

Dividends

The Board of Directors does not recommend the payment of a dividend and the net profit for the year is retained.

Share capital

There were no changes in the share capital of the Company during the year under review.

Board of Directors

The members of the Company's Board of Directors as at 31 December 2019 and at the date of this report are presented on page 1. All of them were members of the Board of Directors throughout the year ended 31 December 2019, with the exception of Mr Costas G. Tsielepis who was resigned on 1 January 2019 and Mr Christophoros Koutouroushis who was appointed on 13 March 2019.

In accordance with the Company's Articles of Association all Directors presently members of the Board continue in office.

There were no significant changes in the assignment of responsibilities and remuneration of the Board of Directors.

Events after the reporting period

Any significant events that occurred after the end of the reporting period are described in note 27 to the financial statements.

Independent Auditors

The independent auditors, Deloitte Limited, have expressed their willingness to continue in office and a resolution authorising the Board of Directors to fix their remuneration will be submitted at the forthcoming Annual General Meeting.

By order of the Board of Directors,

Tatiana Elkina
Director

Limassol, 10 April 2020

Independent Auditor's Report

To the Members of Ronin Europe Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Ronin Europe Limited (the "Company"), which are presented in pages 6 to 33 and comprise the statement of financial position as at 31 December 2019, and the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 December 2019, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the "Auditor's Responsibilities for the Audit of the Financial Statements" section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Cyprus, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The Board of Directors is responsible for the other information. The other information comprises the information included in the Management Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors for the Financial Statements

The Board of Directors is responsible for the preparation of financial statements that give a true and fair view in accordance with International Financial Reporting Standards as adopted by the European Union and the requirements of the Cyprus Companies Law, Cap. 113, and for such internal control as the Board of Directors determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Independent Auditor's Report (continued)

To the Members of Ronin Europe Limited

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of the Board of Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves a true and fair view.

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal Requirements

Pursuant to the additional requirements of the Auditors Law of 2017, we report the following:

- In our opinion, the Management Report has been prepared in accordance with the requirements of the Cyprus Companies Law, Cap 113, and the information given is consistent with the financial statements.
- In our opinion, and in the light of the knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified material misstatements in the Management Report.

Independent Auditor's Report (continued)

To the Members of Ronin Europe Limited

Other Matter

This report, including the opinion, has been prepared for and only for the Company's members as a body in accordance with Section 69 of the Auditors Law of 2017 and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whose knowledge this report may come to.

Share premium is not available for distribution.

Companies which do not distribute 70% of their profits after tax, as defined by the relevant tax law, within two years after the end of the relevant tax year, will be deemed to have distributed as dividends 70% of these profits. Special contribution for defence at 17% will be payable on such deemed dividends to the extent that the ultimate shareholders are both Cyprus tax resident and Cyprus domiciled. The amount of deemed distribution is reduced by any actual dividends paid out of the profits of the relevant year at any time. This special contribution for defence is payable by the Company for the account of the shareholders.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

1. Incorporation and principal activities

Country of incorporation

The Company Ronin Europe Limited (the "Company") was incorporated in Cyprus on 21 August 2006 as a private limited liability company under the provisions of the Cyprus Companies Law, Cap. 113. Its registered office is at 3 Pythagoras Street, Pythagoras Court, Office 301, 3027, Limassol, Cyprus.

Principal activities

The principal activities of the Company, which are unchanged from last year, are the operation as an investment firm and the provision of investment and related services. On 31 October 2007 the Company received a Financial Services license from the Cyprus Securities and Exchange Commission (CySEC) for the provision of these services. The Company's license was subsequently amended on 7 November 2011, whereby the Company has also been granted a license for trading on own account.

2. Basis of preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the European Union (EU) and the requirements of the Cyprus Companies Law, Cap.113. The financial statements have been prepared under the historical cost convention.

3. Adoption of new or revised standards and interpretations

During the current year the Company adopted all the new and revised International Financial Reporting Standards (IFRS) that are relevant to its operations and are effective for accounting periods beginning on 1 January 2019. This adoption did not have a material effect on the accounting policies of the Company, with the exception of IFRS 16 Leases.

The effect on the accounting policies of the Company from the adoption of IFRS 16 is described below:

IFRS 16 Leases

General impact of application of IFRS 16 Leases

IFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements for both lessors and lessees. IFRS 16 supersedes the previous lease guidance including IAS17 Leases and the related Interpretations for accounting periods beginning on or after 1 January 2019. The date of initial application of IFRS 16 for the Company was 1 January 2019.

Impact of the new definition of a lease

The change in definition of a lease mainly relates to the concept of control. IFRS 16 distinguishes between leases and service contracts on the basis of whether the use of an identified asset is controlled by the customer. Control is considered to exist if the customer has:

- The right to obtain substantially all of the economic benefits from the use of an identified asset; and
- The right to direct the use of that asset

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

3. Adoption of new or revised standards and interpretations (continued)

IFRS 16 Leases (continued)

Impact on Lessee Accounting - Operating leases:

IFRS 16 changes how the Company accounts for leases previously classified as operating leases under IAS 17, which were off balance sheet. On initial application of IFRS 16, for all leases (except as per paragraph IFRS16:3), the Company:

- a) Recognises right of use assets and lease liabilities in the statement of financial position, initially measured at the present value of the future lease payments;
- b) Recognises depreciation of right of use assets and interest on lease liabilities in the statement of profit or loss;
- c) Separates the total amount of cash paid into a principal portion (presented within financing activities) and interest (presented within operating activities) in the cash flow statement.

Under IFRS 16, right of use assets is tested for impairment in accordance with IAS 36 Impairment of Assets. This replaces the previous requirement to recognise a provision for onerous lease contracts.

As at 31 December 2019, the Company has non-cancellable operating lease commitments relating to rental expenses. These arrangements relate to short-term leases, hence there is no impact from the adoption of the standard on the financial statements of the Company.

4. Significant accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below.

Revenue

Recognition and measurement

Revenue represents the amount of consideration to which the Company expects to be entitled in exchange for transferring the promised goods or services to the customer, excluding amounts collected on behalf of third parties (for example, value-added taxes); the transaction price. The Company includes in the transaction price an amount of variable consideration as a result of rebates/discounts only to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur when the uncertainty associated with the variable consideration is subsequently resolved. Estimations for rebates and discounts are based on the Company's experience with similar contracts and forecasted sales to the customer.

The Company recognises revenue when the parties have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations, the Company can identify each party's rights and the payment terms for the goods or services to be transferred, the contract has commercial substance (i.e. the risk, timing or amount of the Company's future cash flows is expected to change as a result of the contract), it is probable that the Company will collect the consideration to which it will be entitled in exchange for the goods or services that will be transferred to the customer and when specific criteria have been met for each of the Company's contracts with customers.

The Company bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement. In evaluating whether collectability of an amount of consideration is probable, the Company considers only the customer's ability and intention to pay that amount of consideration when it is due.

Estimates of revenues, costs or extent of progress toward completion are revised if circumstances change. Any resulting increases or decreases in estimates are reflected in the statement of profit or loss and other comprehensive income in the period in which the circumstances that give rise to the revision become known by management.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

4. Significant accounting policies (continued)

Revenue recognition (continued)

Identification of performance obligations

The Company assesses whether contracts that involve the provision of a range of goods and/or services contain one or more performance obligations (that is, distinct promises to provide a service) and allocates the transaction price to each performance obligation identified on the basis of its stand-alone selling price. A good or service that is promised to a customer is distinct if the customer can benefit from the good or service, either on its own or together with other resources that are readily available to the customer (that is the good or service is capable of being distinct) and the Company's promise to transfer the good or service to the customer is separately identifiable from other promises in the contract (that is, the good or service is distinct within the context of the contract).

- **Rendering of services**

Revenue from rendering of services is recognised over time while the Company satisfies its performance obligations by transferring control over the promised services to the customer in the accounting period in which the services are rendered by reference to the completion of the specific transaction assessed on the basis for the actual service provided as a proportion of the total services to be provided and it is probable that the fees will be collected.

- **Income from investments in securities**

Profits or losses from the sale of investments in securities represent the difference between the net proceeds and the carrying amount of the investments sold and is transferred to profit or loss.

- **Commission income**

Commission income is recognised when the service is provided and it is probable that the fee will be collected.

- **Interest income**

Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount.

Finance costs

Interest expense and other borrowing costs are charged to profit or loss as incurred.

Foreign currencies

The financial statements are presented in the currency of the primary economic environment in which the entity operates, the United States Dollars (US\$) (its functional currency).

In preparing the financial statements, transactions in currencies other than the entity's functional currency (foreign currencies) are recorded at the rates of exchange prevailing on the dates of the transactions. At each reporting date, monetary items denominated in foreign currencies are retranslated at the rates prevailing on the reporting date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are included in profit or loss for the period. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised in other comprehensive income and then in equity. For such non-monetary items, any exchange component of that gain or loss is also recognised in other comprehensive income and then in equity.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

4. Significant accounting policies (continued)

Foreign currencies (continued)

The assets and liabilities of the Company's foreign operations (including comparatives) are expressed in United States Dollars using exchange rates prevailing on the reporting date. Income and expense items (including comparatives) are translated at the average exchange rates for the period, unless exchange rates fluctuated significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are classified as equity and transferred to the Company's translation reserve. Such translation differences are recognised in profit or loss in the period in which the foreign operation is disposed off.

Tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in profit or loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the reporting date.

Property, plant and equipment

Property, plant and equipment are stated at historical cost less accumulated depreciation and any accumulated impairment losses.

Depreciation is calculated on the straight-line method so as to write off the cost of each asset to its residual value over its estimated useful life. The annual depreciation rates used are as follows:

	%
Furniture, fixtures and office equipment	10-20
Computer hardware	10-33
Motor vehicles	10-20

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

4. Significant accounting policies (continued)

Leases

The Company as lessee

The Company assesses whether a contract is or contains a lease, at inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate. Lease payments included in the measurement of the lease liability comprise:

- Fixed lease payments (including in-substance fixed payments), less any lease incentives receivable;
- Variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- The amount expected to be payable by the lessee under residual value guarantees;
- The exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- Payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Company did not make any such adjustments during the periods presented.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

4. Significant accounting policies (continued)

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the statement of financial position.

The Company applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, Plant and Equipment' policy.

Variable rents that do not depend on an index or rate are not included in the measurement the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in the line "Other expenses" in profit or loss.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Company has not used this practical expedient. For a contracts that contain a lease component and one or more additional lease or non-lease components, the Company allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

All lease commitments of the Company during the year were short term leases.

Financial assets - Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and
- those to be measured at amortised cost.

The classification and subsequent measurement of debt financial assets depends on: (i) the Company's business model for managing the related assets portfolio and (ii) the cash flow characteristics of the asset. On initial recognition, the Company may irrevocably designate a debt financial asset that otherwise meets the requirements to be measured at amortized cost or at FVTOCI if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

For investments in equity instruments that are not held for trading, classification will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVTOCI). This election is made on an investment-by-investment basis.

All other financial assets are classified as measured at FVTPL.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVTOCI).

Financial assets - Recognition and derecognition

All purchases and sales of financial assets that require delivery within the time frame established by regulation or market convention ("regular way" purchases and sales) are recorded at trade date, which is the date when the Company commits to deliver a financial instrument. All other purchases and sales are recognised when the entity becomes a party to the contractual provisions of the instrument.

Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

4. Significant accounting policies (continued)

Financial assets - Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVTPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss. Fair value at initial recognition is best evidenced by the transaction price. A gain or loss on initial recognition is only recorded if there is a difference between fair value and transaction price which can be evidenced by other observable current market transactions in the same instrument or by a valuation technique whose inputs include only data from observable markets.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are three measurement categories into which the Company classifies its debt instruments:

Amortised cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. Interest income from these financial assets is included in 'other income'. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss and other comprehensive income. Financial assets measured at amortised cost (AC) comprise: cash and cash equivalents, bank deposits with original maturity over 3 months, trade receivables and financial assets at amortised cost.

FVTOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVTOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognised, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in "other income". Foreign exchange gains and losses are presented in "other gains/(losses)" and impairment expenses are presented as separate line item in the statement of profit or loss and other comprehensive income.

FVTPL: Assets that do not meet the criteria for amortised cost or FVTOCI are measured at FVTPL. A gain or loss on a debt investment that is subsequently measured at FVTPL is recognised in profit or loss and presented net within "other gains/(losses)" in the period in which it arises.

Equity instruments

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment, any related balance within the FVTOCI reserve is reclassified to retained earnings. The Company's policy is to designate equity investments as FVTOCI when those investments are held for strategic purposes other than solely to generate investment returns. Dividends from such investments continue to be recognised in profit or loss as other income when the Company's right to receive payments is established.

Changes in the fair value of financial assets at FVTPL and dividend income are recognised in "other gains/(losses)" in the statement of profit or loss and other comprehensive income as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVTOCI are not reported separately from other changes in fair value.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

4. Significant accounting policies (continued)

Financial assets - impairment - credit loss allowance for ECL

The Company assesses on a forward-looking basis the ECL for debt instruments (including loans) measured at AC and FVTOCI and with the exposure arising from loan commitments and financial guarantee contracts. The Company measures ECL and recognises credit loss allowance at each reporting date. The measurement of ECL reflects: (i) an unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes, (ii) time value of money and (iii) all reasonable and supportable information that is available without undue cost and effort at the end of each reporting period about past events, current conditions and forecasts of future conditions.

The carrying amount of the financial assets is reduced through the use of an allowance account, and the amount of the loss is recognised in the statement of profit or loss and other comprehensive income within "net impairment losses on financial and contract assets".

Debt instruments measured at AC are presented in the statement of financial position net of the allowance for ECL. For loan commitments and financial guarantee contracts, a separate provision for ECL is recognised as a liability in the statement of financial position.

For debt instruments at FVTOCI, an allowance for ECL is recognised in profit or loss and it affects fair value gains or losses recognised in OCI rather than the carrying amount of those instruments.

Expected losses are recognised and measured according to one of two approaches: general approach or simplified approach.

For trade receivables including trade receivables with a significant financing component and contract assets and lease receivables the Company applies the simplified approach permitted by IFRS 9, which uses lifetime expected losses to be recognised from initial recognition of the financial assets.

For all other financial asset that are subject to impairment under IFRS 9, the Company applies general approach - three stage model for impairment. The Company applies a three stage model for impairment, based on changes in credit quality since initial recognition. A financial instrument that is not credit-impaired on initial recognition is classified in Stage 1.

Financial assets in Stage 1 have their ECL measured at an amount equal to the portion of lifetime ECL that results from default events possible within the next 12 months or until contractual maturity, if shorter ("12 Months ECL"). If the Company identifies a significant increase in credit risk ("SICR") since initial recognition, the asset is transferred to Stage 2 and its ECL is measured based on ECL on a lifetime basis, that is, up until contractual maturity but considering expected prepayments, if any ("Lifetime ECL"). Refer to note 6, Credit risk section, for a description of how the Company determines when a SICR has occurred. If the Company determines that a financial asset is credit-impaired, the asset is transferred to Stage 3 and its ECL is measured as a Lifetime ECL. The Company's definition of credit impaired assets and definition of default is explained in note 6, Credit risk section.

Additionally the Company has decided to use the low credit risk assessment exemption for investment grade financial assets. Refer to note 6, Credit risk section for a description of how the Company determines low credit risk financial assets.

Financial assets - reclassification

Financial instruments are reclassified only when the business model for managing those assets changes. The reclassification has a prospective effect and takes place from the start of the first reporting period following the change.

Financial assets - write-off

Financial assets are written-off, in whole or in part, when the Company exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. The write-off represents a derecognition event. The Company may write-off financial assets that are still subject to enforcement activity when the Company seeks to recover amounts that are contractually due, however, there is no reasonable expectation of recovery.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

4. Significant accounting policies (continued)

Financial assets - modification

The Company sometimes renegotiates or otherwise modifies the contractual terms of the financial assets. The Company assesses whether the modification of contractual cash flows is substantial considering, among other, the following factors: any new contractual terms that substantially affect the risk profile of the asset (e.g. profit share or equity-based return), significant change in interest rate, change in the currency denomination, new collateral or credit enhancement that significantly affects the credit risk associated with the asset or a significant extension of a loan when the borrower is not in financial difficulties.

If the modified terms are substantially different, the rights to cash flows from the original asset expire and the Company derecognises the original financial asset and recognises a new asset at its fair value. The date of renegotiation is considered to be the date of initial recognition for subsequent impairment calculation purposes, including determining whether a SICR has occurred. The Company also assesses whether the new loan or debt instrument meets the SPPI criterion. Any difference between the carrying amount of the original asset derecognised and fair value of the new substantially modified asset is recognised in profit or loss, unless the substance of the difference is attributed to a capital transaction with owners.

In a situation where the renegotiation was driven by financial difficulties of the counterparty and inability to make the originally agreed payments, the Company compares the original and revised expected cash flows to assets whether the risks and rewards of the asset are substantially different as a result of the contractual modification. If the risks and rewards do not change, the modified asset is not substantially different from the original asset and the modification does not result in derecognition. The Company recalculates the gross carrying amount by discounting the modified contractual cash flows by the original effective interest rate, and recognises a modification gain or loss in profit or loss.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. Cash and cash equivalents are carried at AC because: (i) they are held for collection of contractual cash flows and those cash flows represent SPPI, and (ii) they are not designated at FVTPL.

Financial assets at amortised cost

These amounts generally arise from transactions outside the usual operating activities of the Company. These are held with the objective to collect their contractual cash flows and their cash flows represent solely payments of principal and interest. Accordingly, these are measured at amortised cost using the effective interest method, less provision for impairment. Financial assets at amortised cost are classified as current assets if they are due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current assets.

Financial liabilities - measurement categories

Financial liabilities are initially recognised at fair value and classified as subsequently measured at amortised cost, except for (i) financial liabilities at FVTPL: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in securities), contingent consideration recognised by an acquirer in a business combination and other financial liabilities designated as such at initial recognition and (ii) financial guarantee contracts and loan commitments.

Trade payables

Trade payables are initially measured at fair value and are subsequently measured at amortised cost, using the effective interest rate method.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

4. Significant accounting policies (continued)

Offsetting financial instruments

Financial assets and financial liabilities are offset and the net amount reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the statement of financial position.

Share capital

Ordinary shares are classified as equity. The difference between the fair value of the consideration received by the Company and the nominal value of the share capital being issued is taken to the share premium account.

Customer assets and clients funds

Cash held on behalf of clients and financial instruments held in a fiduciary capacity are not treated as assets of the Company and, accordingly, are not included in these financial statements.

Comparatives

Where necessary, comparative figures have been adjusted to conform to changes in presentation in the current year.

5. New accounting pronouncements

At the date of approval of these financial statements, standards and interpretations were issued by the International Accounting Standards Board which were not yet effective. Some of them were adopted by the European Union and others not yet. The Board of Directors expects that the adoption of these accounting standards in future periods will not have a material effect on the financial statements of the Company.

At the date of approval of these financial statements the following accounting standards were issued by the International Accounting Standards Board but were not yet effective:

(i) Adopted by the European Union

Amendments

IFRS Interpretations Committee

- *Amendments to IFRS 9, IAS 39 and IFRS17: Interest Rate Benchmark Reform (effective for annual periods beginning 1 January 2020)*
- *Amendments to IAS 1 and IAS 8: Definition of Material (effective for annual periods beginning 1 January 2020)*
- *Amendments to References to the Conceptual Framework in IFRS Standards (effective for annual periods beginning 1 January 2020)*

(ii) Not adopted by the European Union

New standards

- *IFRS 17 "Insurance Contracts" (effective for annual periods beginning on or after 1 January 2021).*

Amendments

- *Amendments to IAS 1 Presentation of Financial Statements: Classification of Liabilities as Current of liabilities as Current or Non-current (issued on 23 January 2020). I*
- *Amendment to IFRS 3 Business Combinations (issued on 22 October 2018) (effective for annual periods beginning on or after 1 January 2020)*

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

5. New accounting pronouncements (continued)

The Board of Directors expects that the adoption of these standards or interpretations in future periods will not have a material effect on the financial statements of the Company.

6. Financial risk management

Financial risk factors

The Company is exposed to credit risk, liquidity risk, currency risk, other market price risk, tourist industry risk, operational risk, compliance risk, litigation risk, reputation risk, share ownership risk, capital risk management and other risks arising from the financial instruments it holds. The risk management policies employed by the Company to manage these risks are discussed below:

6.1 Credit risk

Credit risk arises from cash and cash equivalents, contractual cash flows of debt investments carried at amortised cost and at fair value through other comprehensive income (FVTOCI) and deposits with banks and financial institutions, as well as credit exposures to receivables from clients.

(i) Risk management

Credit risk is managed on a group basis.

For banks and financial institutions, only independently rated parties with high credit rating are accepted. If customers are independently rated, these ratings are used.

Otherwise, if there is no independent rating, management assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual credit limits and credit terms are set based on the credit quality of the customer in accordance with limits set by the Board of Directors. The utilisation of credit limits is regularly monitored. The Company holds cash collateral for balances from clients.

(ii) Impairment of financial assets

The Company has the following types of financial assets that are subject to the expected credit loss model:

- trade receivables
- financial assets carried at FVTOCI
- cash and cash equivalents

Trade receivables

The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables.

An impairment analysis is performed at each reporting date using a provision matrix produced by using historic default and loss rates benchmarked to industry averages, made available by rating agencies in order to measure expected credit losses. The loss rates are established by considering current conditions and future economic conditions. To measure the expected credit losses, trade receivables are grouped together based on shared credit risk characteristics and the days past due.

The expected credit loss rates applied to the trade receivables are close to zero, which represent the historical default rates experienced by the Company, adjusted to reflect forward looking information on macroeconomic factors and industry default rates and loss rates affecting the ability of the charterers to settle the receivables.

On that basis, the loss allowance as at 31 December 2019 and 1 January 2019 for trade receivables was assessed to be minimal and no loss allowance has been recognized in the financial statements.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

6. Financial risk management (continued)

6.1 Credit risk (continued)

(ii) Impairment of financial assets (continued)

Debt investments

All of the entity's debt investments at FVTOCI are considered to have low credit risk, and the loss allowance recognised during the period was therefore limited to 12 months expected losses. Management consider 'low credit risk' for listed bonds to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to be low credit risk when they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

Debt investments at fair value through other comprehensive income

Debt investments at fair value through other comprehensive income (FVTOCI) include listed debt securities. The loss allowance for debt investments at FVTOCI is recognised in profit or loss and reduces the fair value loss otherwise recognised in OCI.

The loss allowance for debt investments at FVTOCI as at 31 December 2018 reconciles to the opening loss allowance on 1 January 2019 and to the closing loss allowance as at 31 December 2019 as follows:

	US\$
Amounts restated through opening retained earnings	(709,215)
Opening loss allowance as at 1 January 2018 - calculated under IFRS9	(709,215)
Increase in loss allowance recognised in Profit or Loss during the year	(591,757)
Balance at 31 December 2018	(1,300,972)
Decrease in loss allowance recognised in Profit or Loss during the year	359,900
Balance at 31 December 2019	(941,072)

Cash and cash equivalents

The Company measures its expected credit loss for its cash and cash equivalents by reference to the banks' external credit ratings and relevant published default and loss rates. The Company monitors changes in external credit ratings and default rates and compares these to credit risk at initial recognition. As the Company's cash and cash equivalents are held in banks with high credit quality ratings with investment grade, the probability of default is low and the expected credit loss is minimal. Thus, no loss has been recognized in the financial statements.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

6. Financial risk management (continued)

6.1 Credit risk (continued)

(iii) Credit quality of financial assets

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if applicable) or to historical information about counterparty default rates:

	2019 US\$	2018 US\$
Counterparties with external credit rating (Standard and Poor's)		
AAA	1,009,790	6,340,875

	<u>313,095</u>	<u>340,390</u>

⁽¹⁾The difference with the Statement of Financial Position item "Cash and cash equivalents" amounting to US\$36,618,64 (2018: US\$1,204,02) relates to Cash in hand and uncleared cheques issued.

None of the financial assets that are fully performing has been renegotiated.

6.2 Liquidity risk

Liquidity risk is the risk that arises when the maturity of assets and liabilities does not match. An unmatched position potentially enhances profitability, but can also increase the risk of losses. The Company has procedures with the object of minimising such losses such as maintaining sufficient cash and other highly liquid current assets and by having available an adequate amount of committed credit facilities.

The following tables detail the Company's remaining contractual maturity for its financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The table includes both interest and principal cash flows.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

6. Financial risk management (continued)

6.2 Liquidity risk (continued)

31 December 2019	Carrying amounts US\$	3 months or less US\$	3-12 months US\$	1-2 years US\$	2-5 years US\$	More than 5 years US\$
Trade and other payables	72.479	72.479	-	-	-	-
Payables to related parties	4.903	4.903	-	-	-	-
	77.382	77.382	-	-	-	-
31 December 2018	Carrying amounts US\$	3 months or less US\$	3-12 months US\$	1-2 years US\$	2-5 years US\$	More than 5 years US\$
Trade and other payables	90.405	90.405	-	-	-	-
Payables to related parties	5.341	5.341	-	-	-	-
	95.746	95.746	-	-	-	-

6.3 Currency risk

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. Currency risk arises when future commercial transactions and recognised assets and liabilities are denominated in a currency that is not the Company's measurement currency. The Company is exposed to foreign exchange risk arising from various currency exposures primarily with respect to the Euro, GBP and the Russian Ruble. The Company's Management monitors the exchange rate fluctuations on a continuous basis and acts accordingly.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the reporting date are as follows:

	Liabilities		Assets	
	2019 US\$	2018 US\$	2019 US\$	2018 US\$
Euro	(65.488)	(74.500)	136.613	58.776
British Pounds	-	-	59.606	24.501
Swiss Franc	-	-	349	45
Russian Ruble	(11.863)	(15.671)	127.742	48.705
Swedish Krona	-	-	1	-
	(77.351)	(90.171)	324.311	132.027

Sensitivity analysis

A 10% strengthening of the United States Dollars against the following currencies at 31 December 2019 would have increased (decreased) equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant. For a 10% weakening of the United States Dollars against the relevant currency, there would be an equal and opposite impact on the profit and other equity.

	Equity		Profit or loss	
	2019 US\$	2018 US\$	2019 US\$	2018 US\$
Swedish Krona	-	-	-	-
Euro	7.113	(1.573)	7.113	(1.573)
British Pounds	5.961	2.451	5.961	2.451
Russian Ruble	11.589	3.303	11.589	3.303
Swiss Franc	35	5	35	5
	24.698	4.186	24.698	4.186

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

6. Financial risk management (continued)

6.4 Debt securities price risk

Debt securities price risk is the risk of loss as a result of adverse changes in the prices of debt securities held by the Company. Debt security prices change as the credit risk of the issuers change. The Company invests a significant part of its liquid assets in debt securities, both sovereign and corporate bonds. The Company constantly monitors the risk rating of its investments through various rating agencies, refer to note 12 for the credit risk rating of each individual issuer. Changes in the prices of debt securities classified as available-for-sale investments affect the equity of the Company (if not impaired).

	2019 US\$	2018 US\$
	Impact on Equity	Impact on Equity
Change in market prices		
+2.5%	1.326.564	1.072.618
+5%	2.653.128	2.145.235
+10%	5.306.256	4.290.470

6.5 IT risk

IT risk could occur as a result of inadequate information technology and processing, or arise from an inadequate IT strategy and policy or inadequate use of the Company's information technology. The Company's Business Continuity Plan addresses the consequences of IT risk. Specifically, policies have been implemented regarding back-up procedures, software maintenance, hardware maintenance, use of the internet and anti-virus procedures. Materialization of this risk has been minimized to the lowest possible level.

6.6 Operational risk

Operational risk is the risk of loss arising from fraud, unauthorized activities, error, omission, inefficiency, systems' failure or external events. It is inherent in every business organization and covers a wide range of issues.

The Company manages operational risk through a control-based environment in which processes are documented and transactions are reconciled and monitored. This is supported by a program of audits undertaken by the Internal Auditors of the Company and by continuous monitoring of operational risk incidents to ensure that past failures are not repeated. In addition the Company manages this risk via onsite inspections by the Compliance Officer, maintaining a Disaster Recovery and Business Continuity plan and information security policy.

6.7 Strategic risk

This could occur as a result of adverse business decisions, improper implementation of decisions or lack of responsiveness to changes in the business environment. The Company's exposure to strategic risk is moderate as policies and procedures to minimize this type of risk are implemented in the overall strategy of the Company.

6.8 Legal and Compliance risk

This could arise as a result of breaches or non-compliance with legislation, regulations, agreements or ethical standards and have an effect on earnings and capital. The probability of such risks occurring is relatively low due to the detailed internal procedures and policies implemented by the Company and regular reviews by the Internal Auditors and Compliance Officer. The structure of the Company is such to promote clear coordination of duties and the management consists of individuals of suitable professional experience, ethos and integrity, who have accepted responsibility for setting and achieving the Company's strategic targets and goals. In addition, the board meets at least annually to discuss such issues and any suggestions to enhance compliance are implemented by management.

6.9 Reputation risk

Reputation risk is the current or prospective risk to earnings and capital arising from an adverse perception of the image of the Company on the part of customers, counterparties, shareholders, investors or regulators. Reputation risk could be triggered by poor performance, the loss of one or more of the Company's key directors, the loss of large clients, poor customer service, fraud or theft, customer claims and legal action, regulatory fines.

The Company has policies and procedures in place when dealing with possible customer complaints in order to provide the best possible assistance and service under such circumstances. The Company's Directors are made up of high caliber professionals who are recognized in the industry for their integrity and ethos; this adds value to the Company.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

6. Financial risk management (continued)

6.10 Business risk

This includes the current or prospective risk to earnings and capital arising from changes in the business environment including the effects of deterioration in economic conditions. Research on economic and market forecasts are conducted with a view to minimize the Company's exposure to business risk. These are analyzed and taken into consideration when implementing the Company's strategy.

6.11 Capital risk

This is the risk that the Company will not comply with capital adequacy requirements. The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders. The Company has a regulatory obligation to monitor and implement policies and procedures for capital risk management. Specifically, the Company is required to test its capital against regulatory requirements and has to maintain a minimum level of capital. This ultimately ensures the going concern of the Company. Such procedures are explained in detail in the Policy and Internal Operations manual of the Company.

The Company is further required to report on its capital adequacy each month and has to maintain at all times a minimum capital adequacy ratio which is set at 8%. The capital adequacy ratio expresses the capital base of the Company as a proportion of the total risk weighted assets. Management monitors such reporting and has policies and procedures in place to help meet the specific regulatory requirements. This is achieved through the preparation on a monthly basis of accounts to monitor the financial and capital position of the Company.

6.12 Regulatory risk

Regulatory risk is the risk the Company faces by not complying with relevant Laws and Directives issued by its supervisory body. If materialized, regulatory risk could trigger the effects of reputation and strategic risk. The Company has documented procedures and policies based on the requirements of relevant Laws and Directives issued by the Commission; these can be found in the Internal Operations Manual. Compliance with these procedures and policies are further assessed and reviewed by the Company's Internal Auditors and suggestions for improvement are implemented by management. The Internal Auditors evaluate and test the effectiveness of the Company's control framework at least annually. Therefore the risk of non-compliance is very low.

6.13 Safeguarding of clients' assets

The Company is also required to comply with the requirements of Part II, paragraphs 4-9 of the Directive DI87-01 of CySEC for the purposes of safeguarding clients' rights in relation to financial instruments and belongings to them. According to the requirements of the Directive, the Company must establish such internal control procedures around the receipt, maintenance and transmission of clients' assets to ensure the best possible level of protection for clients' financial instruments. These procedures include the segregation of clients' financial instruments from the entity's financial instruments, the performance of reconciliations, the circularisation of account statements to clients and other procedures.

6.14 CySEC Requirements

Extensive disclosures as required by the Directive DI144-2014-14 of the Cyprus Securities and Exchange Commission for the Prudential Supervision of Investment Firms which will be published on the Company's website on 31 July 2020.

Fair value estimation

The fair values of the Company's financial assets and liabilities approximate their carrying amounts at the reporting date.

7. Critical accounting estimates and judgments

The preparation of financial statements in conformity with IFRSs requires the use of certain critical accounting estimates and requires Management to exercise its judgment in the process of applying the Company's accounting policies. It also requires the use of assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on Management's best knowledge of current events and actions, actual results may ultimately differ from those estimates.

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

7. Critical accounting estimates and judgments (continued)

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Judgments

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

- **Income taxes**

Significant judgment is required in determining the provision for income taxes. There are transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

- **Impairment of financial assets**

The loss allowances for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period. Details of the key assumptions and inputs used are disclosed in note 6, Credit risk section.

8. Revenue

The revenue of the Company consists of the following:

	2019	2018
	US\$	US\$
Brokerage commissions	9,333,864	5,422,737
Performance fees	1,195,304	-
Portfolio management fees	862,829	1,942,451
Custody commission	702,153	618,628
Account management fees	520,399	699,074
Investment income (bond interest)	2,056,691	1,806,657
Other income	12,053	2,802
	<u>14,683,293</u>	<u>10,492,349</u>

Investment income is represented by coupon interest earned by the Company on bonds held by the Company during the year as disclosed in note 17.

9. Direct costs

	2019	2018
	US\$	US\$
Depository and maintenance fees	707,635	556,411
Other direct costs	663,942	549,652
Brokerage fees	1,813,288	1,509,156
	<u>3,184,865</u>	<u>2,615,219</u>

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

10. Other operating income

	2019 US\$	2018 US\$
Decrease of loss allowance on debt instruments measured at FVTOCI	359.900	-
Net gain from disposal of financial assets at FVTOCI	-	150.239
Other income	3.127	115
	<u>363.027</u>	<u>150.354</u>

11. Other expenses

	2019 US\$	2018 US\$
Loss allowance on debt investments measured at FVTOCI	-	591.757
Net loss from disposal/redemption of financial assets at FVTOCI	15.700	-
	<u>15.700</u>	<u>591.757</u>

12. Operating profit

	2019 US\$	2018 US\$
Operating profit is stated after (crediting)/charging the following items:		
Loss/(profit) from the disposal/redemption of financial assets at FVTOCI (Note 17)	15.700	(150.239)

RONIN EUROPE LIMITED

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

26. Country by country reporting

Part II, Section 2, Paragraph 18 the Directive DI144 2014 14 of the Cyprus Securities and Exchange Commission of the Prudential Supervision of Investment Firms requires CIFs to disclose annually, by Member State and by third country in which it has establishment the following information.

The Company's return on assets calculated as the net profit divided by the total assets for 2019 was 15,6% (2018: 9,9%).

Company name	Nature of activities	Jurisdiction	Turnover	Number of employees	Profit/ (Loss) before tax	Tax on profit/ (loss)	Public subsidies received
			US\$		US\$	US\$	US\$
Ronin Europe Limited	Financial services	Cyprus	14.690.683	19	10.114.271	1.257.035	-
		Total	14.690.683	19	10.114.271	1.257.035	-

27. Events after the reporting period

With the recent and rapid development of the Coronavirus (COVID-19) outbreak the world economy entered a period of unprecedented health care crisis that has already started causing considerable global disruption in business activities and everyday life. Many countries have adopted extraordinary and economically costly containment measures requiring in some cases companies to limit or even suspend normal business operations and governments to implement restrictions on travelling as well as strict quarantine measures.

A number of industries are expected to be disrupted significantly by these measures whereas others like financial services are expected to incur sideways losses. Considering the above unfortunate circumstances, the pace at which the outbreak expands and because of the high level of uncertainties due to the unpredictable outcome of this outbreak, the financial effect of the current crisis on the global economy and the overall business activities going forward is not possible to be estimated with reasonable certainty at this stage.

Management is closely monitoring the developments in relation to the Coronavirus (COVID-19) outbreak on a continuous basis and has considered the unique circumstances and the risk exposures of the Company. As of today, the current trading portfolio of the Company did not have any significant impact and the trading volumes of its clients have seen a small growth. However, since the management is still in the early stages of fully understanding the economic impact of the outbreak and because of the high level of uncertainties involved, the management will continue to monitor the situation closely and will assess the need for any measures to be taken, in case the period of disruption is prolonged.

There were no other material events after the reporting period, which have a bearing on the understanding of the financial statements.

Independent auditor's report on pages 3 to 5
